DevFest 2026

Organizer Brand Guide

Google Developer Groups

Professionally designed assets have been created to bring a unified look and feel to all DevFest events around the world.

Asset Folder

GDG organizers, please use the assets provided when possible. Use this deck to view and download designed files.

You may use Google Drawings (a free tool) or Adobe Illustrator to edit the text for your chapter name and event details on assets. Adobe offers a free trial of their software here.

Reference the main GDG Brand Guide for additional tips on how to promote your events.

How do I customize event assets using Google Drawings?

To create your own asset, simply make a copy of of the Google Drawing you are looking to recreate.

Once you have made your own copy of the asset, you can edit the location, text, and photos to your liking. Keeping within the guidelines noted in this document will ensure your version is on-brand.

How do I export my asset?

To export your customized DevFest asset, go to File > Download > and select the preferred file type. In most cases, this will either by .jpg or .png

Brand Assets

DevFest Logo: Main

Download

Assets within this guide contain the appropriate logo lockup. Use these files when creating a new asset. Please include ample clear space all the way around the artwork.

Primary DevFest wordmark

Primary DevFest wordmark with year

DevFest Logo: Editable Location

Download

Use the provided Google Drawings or .AI file to create logo lockups with custom event location.

For example a GDG New York DevFest event would replace “Editable Location” with “New York”.

Secondary DevFest Lockup with Editable Location

Colors

Please use the colors documented here in all assets and communications.

The DevFest brand system leverages the core Google color palette as well as variations to be used for emphasis and contrast needs.
